Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1848 Excerpt: .would furnish us with rules for finding a weight, which, being accumulated uniformly in the circumference, a b c d, would exert an inertia equal to that of the wheels. But as the figures are wholly irregular, recourse must be had to experiment for the discovery of such a weight. For this purpose a weight of thirty grains was affixed to a silk line which did not weigh one-quarter of a grain; this line being wound round the wheel, the weight of thirty grains, by descending from rest, communicated motion to the wheel, and, by many trials, was observed to describe a space of thirty-eight and a half inches in three seconds. From these data we find the mass equivalent to the inertia to be two ounces and three quarters. This is a mass equivalent to the inertia of the wheel, abed, and the frictipnwheels together. The resistance to motion, therefore, arising from the wheel s inertia will be the same as if it were absolutely removed, and a mass of 2f were accumulated in the circumference of the wheel, abed. This being premised, suspend the pieces, or brass boxes, A, B, by a silk line passing over the wheel, abed, and make them balance each other; now, if I add any weight, To, to A, so that it shall descend, the exact quantity of matter moved will be ascertained, for it will Be A added to B, added to To, added to 2J oz. Mr....
