## Labour Productivity in Indian Industry

---

By M.K. Singh

Mittal Publications, New Delhi, 1989. N.A. Book Condition: New. Xii+270pp The book provides a comprehensive coverage to the course, content and requirements of the research scholars and for those preparing for higher studies. It will be useful not only for the students, teachers and research scholars but also for the executive who work in Steel Industry. The present book analyses the movement of productivity in Indian industries, particularly iron and steel industry in India. The central purpose of the study is to examine the comparative movement of productivity in steel industry of public sector and private sector with a particular reference to Bokaro steel plant. The study has been grouped under ten chapters. The first three chapters cover the study of the concept of labour productivity, wages and profits. The statistical study of the effect of technical factors and the human factors on productivity of Bokaro steel plant stretch to the following three chapters. Whereas, chapter seven, eight and nine are devoted to the study of the trend in wages and profits as well as their correlation with productivity. Conclusion of the study presents the author's view with regard to the measures to be adopted in order to bring upon...
